

**Internexia's**

Chairman, Bismillar Kader, has extensive experience in

Since setting up Internexia in 1996, Bismillah and David have managed the development and delivery of

We have been joined in Internexia by Dr Yasmin Weaver and Timothy Bailey. For six years, Yasmin and Timothy were involved at a senior level in the design and delivery of technology platforms to support schools and their teachers and students, in England. Yasmin managed the Training and Implementation team while Timothy managed Support and Operations. They delivered services to over 30 Local Authorities and 4,000+ learning institutions, meeting the needs of over 1.3 million users with daily support services.

Internexia's senior staff are recognized for presenting leading work in the field of education at international and UK conferences. Yasmin, Internexia's Solutions Architect, has been a major contributor to the Schools Interoperability Framework Association (SIFA UK) and was a board member of the Teaching and Learning Committee for SIFA UK. Tim delivered a paper at the AACE (Association of Advancement in Computing in Education) conference held in Penang in 2010.

Internexia understands the challenges organisations face when implementing a new system. We work closely with our customers to ensure expectations are met and the appropriate solution is effectively adopted by the target audience.

Internexia provides premium technical, product and curriculum support services. Internexia's team of skilled instructional designers, multimedia specialists, programmers, trainers, subject matter experts and support services work to recognized industry standards such as PRINCE2

and ITIL. Our team provides turnkey solutions from concept through development to support and maintenance.

If you are looking to implement a training or software solution, please [contact us](#) for an obligation free consultation.
