

Internexia Sdn. Bhd. is an MSC status company focusing on education, training, eLearning content transformation, learning management system development and corporate training. Internexia's mission is to lead the development of education without frontiers.

Our aim is to offer affordable, high quality, interactive multimedia-based education and skills training to meet local and international demands. Our modular courses are designed for both education and skills development and allow flexible choice of study and progression. The courses we have produced can be delivered to learners in several ways; full face-to-face, blended or 100% self-study.

Internexia has a proven track record of providing high quality educational content and delivery systems both nationally and internationally.

The team at Internexia have been instrumental to the successful adoption of the largest educational LMS in the UK. Internexia has the technical and pedagogical qualifications, skills and experience to design and implement an end-to-end solution to realise your organization's eLearning or training initiative.

Internexia operates to internationally recognized standards. Projects are delivered in accordance with PRINCE2 Project Management methodology and Support Services in accordance with ITIL (IT Infrastructure Library) best practice.

Education without frontiers

- **Vision:** *"To be the preferred provider of learning experiences that enrich intelligence, enhance capability and promote lifelong learning."*

- **Mission:** *"Enable, extend and improve the educational opportunities and achievements of learners through the effective and innovative use of Information Communications Technology."*
