

Kirkby International College (KIC) is a centre of excellence for teacher education and training. KIC's aim is to train teachers, enabling them to provide meaningful learning experiences for their students.

Needs

KIC wanted a learning management system (LMS) that would support and enhance the teachers' education and training, and which could be accessed from wherever their lecturers and teachers were located.

Solution

Internexia worked closely with KIC to provide a holistic teaching and learning approach. Internexia's Acquire and Seek Knowledge (ASK) LMS allows lecturers to upload learning modules, lecture notes, resources and assignments which can be accessed by the teachers wherever they are.

ASK provides an excellent channel of communication between lecturers and teachers. News about classes, activities, assignments and examinations can be communicated instantly through ASK.

Teachers can post questions or discussion topics in the Forum pages and can expect a response from their peers or lecturers. Assignments and quizzes can be submitted through ASK and results posted in the system.

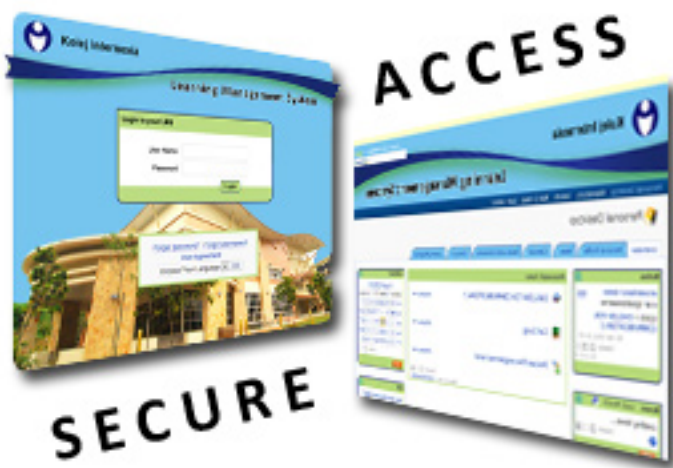

The ASK LMS creates and supports an enhanced teaching and learning experience for lecturers and trainee teachers at KIC.
