

TAJ International College has taken teaching, learning and communication to a higher level with the use of a bespoke Acquire and Share Knowledge (ASK) Learning Management System (LMS) designed by Internexia.

Lecturers can now upload their modules, lecture notes, resources and assignments which can be accessed by students wherever they are.

Students may post questions or discussion topics at any time in the Forum pages and can expect a response from their peers or lecturers.

Communication between lecturers and students has never been more efficient. News about examinations or replacement classes are communicated to students instantly through ASK.

Both lecturers and students have their own profile pages in ASK, allowing for better administrative control and tracking. The ASK learning management system creates a better teaching and learning experience for faculty and non-faculty members as well as the entire student body at TAJ.
