

In

November 2010, Internexia signed an agreement with MOE Thailand for the

The task-based programme focuses on the creation of educationally relevant, multimedia rich e-Learning

The ICT4L programme:

- Demonstrates how to enhance teaching and learning using ICT through technology sharing and a
- Technical training on familiar software and open source tools and applications that can be used to

- Emphasis on the importance of curriculum mapping and lesson planning techniques to build effective lessons.
- Deliver cascade-training to fellow teachers.
- Interactive sessions using real examples of the core principles of e-learning and ICT enrichment.

The ICT4L programme initiated a forum forming an online teaching network. This facilitates the sharing of knowledge and resources.

The ICT4L programme is designed for in-service teachers. The programme adds value to a teacher's knowledge and skills.

In each module, Internexia encourages collaboration and sharing of knowledge. The programme enables teachers to learn from each other.
