

Harnessing the power of information communication technology decreases costs and improves quality. Understanding the concepts and applications of eLearning helps you make informed decisions on how and when you can implement a solution to meet your goals.

Save 60% or more in tra

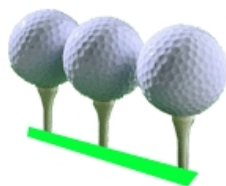

Your ROI improves each time your learner accesses the course. Savings increase when learning is self-paced.

Extend opportunities to

A minimal additional investment gives your team unlimited access to your courses.

'Freedom to fail'

Allow your learners to practice and take the course and assessment as many times as they like. There are no penalties for failure.

Increase productivity and training accessible 24x7x365

There is no need for a training room. Turn your dedicated training room into another office or R&R room.
Anywhere, anytime learning

Allow your learners to learn at home or from wherever they are. Internet access is not essential; make it optional.
Contribute to saving the environment (ISO14001)

Decreased (or no) travel, no lighting or air-conditioning, no printing (paper or photocopier). A study by IBM shows that eLearning can save up to 50% on training costs.
Support differentiated learning

Use the same material for different learning styles and abilities.

Meet your learners' eLearning needs

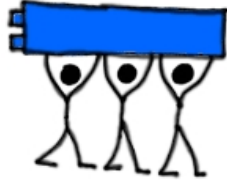

Technology is present in all aspects of our lives and has become an expectation.
Standardize and continue to improve our training courses

Deliver the same course in Malaysia as you would in America. Use learner feedback and enhance the course.
Monitor your learners' progress and produce reports automatically

Increase engagement and **improve the course**, and perform to the level you require.

Improve retention choice and ownership - let the learner take control of their learning.

Encourage use of multimedia and instructional design gives a rich and rewarding learning experience.

Use dedicated tools within a learning management system to encourage collaboration and conversation if you don't know how to manage a learning system that meets your needs. [Please](#)
