

Created date: 14 September 2012

Internexia Sdn. Bhd ia a multimedia development company based in Cyberjaya specializing in developing innovative e-learning systems.

We are currently seeking for a part time/contract PHP Programmer to work primarily on the back-end system of our products. The work involves developing a system similar to those used in social networking web applications, based on the concept of building an online community of users of our e-learning products.

Requirements

- At least two years experience in PHP, including object-oriented development.
- Proficiency in MySQL and database fundamentals (normalization, joins, schemas, etc.)
- Proficiency in JavaScript AJAX, JQuery strongly preferred.
- Working knowledge of HTML and CSS and all aspects of cross-platform browser development.
- Excellent debugging and problem solving skills Must have a portfolio and be able to show the source code.
